

Vortibreak[®] Anti-Vortex Plates

Franklin Hodge Industries offers a range of tested and approved pump suction anti-vortex plates, suitable for use in fire sprinkler and general water storage tanks.

Vortibreak[®] anti-vortex plates supplied by Franklin Hodge Industries meet with and are certified and listed by the following internationally recognised approval authorities:

- U.K. Loss Prevention Certification Board (LPCB)
- U.S. Factory Mutual (FM Global)

In addition, **Vortibreak[®]** anti-vortex plates meet with the requirements of BS EN 12845

Benefits of the Franklin Hodge **Vortibreak[®]** design include:

- System compliance – recognised approvals
- Easy site installation – nut & bolt assembly
- Corrosion resistance – hot dip galvanized (BS EN ISO 1461)
 - Proven system – in use for over twenty years
 - Savings on transport costs – flat pack delivery
